

The Purilux Pro is a smart 2'x2' high efficient LED fixture, that consistently purifies the air. The Purilux Pro continuously pulls in the surrounding polluted air with its built-in medical grade centrifugal fan. Using its FDA approved active carbon filters, HEPA filters, and high intensity UVC lights, it permanently kills all viruses, germs and pathogens in the air, including COVID-19. The Purilux Pro then projects the sanitized air back into the space.

The combination of these technologies significantly improves air circulation in an indoor space. The Purilux Pro comes with a smart remote control that provides additional functionality at your fingertips.

- Significant & measurable improvement in air quality within minutes
- Capable of purifying up 12,000 cubic ft of air per hour (212cfm), equivalent to 3-5 full air exchanges per 400 sq ft
- Physical appearance looks similar to industry standard recessed panels
- Smart Remote Control allows for:
  - Dimming: 25% / 50% / 75% / 100%
  - Color selection: 3000K / 4000K / 5000K
  - Mode Selection: Light + Purify / Purify Only / Light Only
- Longer lifepsan (50,000 hours) / 5 year warranty
- Vibration and impact resistant
- UVA versions available
- Quiet performance
- Instant ON/OFF

### CERTIFICATIONS

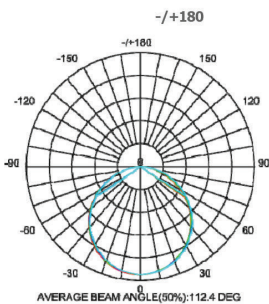

### SPECIFICATIONS

Input Voltage:	120V-277V
Input Frequency:	50Hz-60Hz
Lumen Efficacy:	160LM/W
Wattage & Light Output (Photopic)	25W:4,000 Lumens 32W:5,120 Lumens
Visible Factor:	1.5X
Power Factor:	>0.99
Working Environment:	Indoor
Kelvin output:	CCT Changable: 3000K/ 4000K/ 5000K
Mounting types:	Recessed / Surface-mount / Suspended <sup>1</sup>
Dimming:	With remote control / 0-10V
Operating Temperature:	-30 °F to 170 °F
Mercury Concentration:	None
Noise level:	<40dB

<sup>1</sup> Surface mount kits sold separately  
<sup>2</sup> Suspended mount kits sold separately
