PROACTIVE MAINTENANCE

InCare™

We believe that prevention is more cost effective than repair, therefore we have revolutionized equipment maintenance through InCare™, our service software created to give operators and owners a peace of mind. By automating and streamlining complex, time-consuming maintenance process, InCare™ saves time and cost, enabling operators to focus on revenue generating activities while ensuring equipment longevity and minimal downtime.

InCare™

01

ASSET TRACKING &DIAGNOSIS

ITEST™ software tracks equipment usage, performance, and condition, providing self-diagnostics.

02

AUTOMATED PROCESS

To catch potential issues before service is required upon detecting an issue, a diagnostic report is auto-generated and sent to intenza service.

Team. We identify potential root cause, and provide solutions for your service team.

03

iREMOTE SUPPORT

With the iRemote assist feature, intenza's service team can remotely control equipment to resolve issues, minimizing on-site visits and streamlining the service process.
