

RUBBER FLOORING

Rolls, Stacked, Puzzle Tiles, 1" Tiles

Maintenance Instructions

BUY NOW

Initial Cleaning

- 1 Remove all loose debris by vacuuming, sweeping or by using a dust mop.
- 2 Wet scrub the floor by using a buffer or auto scrubber fitted with a soft nylon brush or 3M Blue Cleaner Pad 5300 or equivalent. The floor can also be cleaned by hand by using a microfiber mop head. We recommend using Zogics Rubber Sport Flooring Cleaner & Degreaser (product manufactured by Zogics – see notes) as a detergent for cleaning and maintenance but any neutral pH (7–9) is acceptable to use on the floor. Dilute the solution 1 oz. per gallon of water. Do not flood the floor with water.
- 3 Use a wet vacuum to pick up the cleaning solution from the floor and rise with clean water. Again, do not flood the floor. The rinse water should then be wet vacuumed from the floor.
- 4 Allow the floor to dry before foot traffic.

Regular Maintenance

- 1 Keep surface free from loose debris by sweeping, using a dust mop or by vacuuming the surface daily or as needed.
- 2 Damp mop surface by using a microfiber mop head or by using an auto scrubber fitted with a soft nylon brush. Use Zogics Rubber Sport Flooring Cleaner & Degreaser as the detergent and dilute 1 oz./gallon water.
- 3 Use a wet vacuum to pick up the cleaning solution from the floor and rise with clean water. Again, do not flood the floor. The rinse water should then be wet vacuumed from the floor.
- 4 Allow the floor to dry before foot traffic.

Disinfecting Protocol

- 1 Keep surface free from loose debris by sweeping, using a dust mop or by vacuuming the surface.
- 2 Thoroughly apply an EPA-approved disinfectant (we recommend using Zogics Commercial Disinfectant Concentrate; 2oz. per 1 gallon of water) to rubber flooring using a sponge, cloth, or spray.
- 3 Allow to sit for a minimum of 10 minutes before rinsing or air drying.
- 4 Wet vacuum any remaining wet areas.
