Wipes vs. Spray Cleaning

Regardless of if you prefer pre-moistened wipes or the classic spray bottle and towel, the important thing to remember is how to properly (and effectively) clean your equipment no matter what you're using.

Here are some things to keep in mind when choosing wipes or spray cleaners for your facility.

GYM WIPES

- no preparation required, just install dispensers
- completely disposable, leaving no mess after use
- wipes are stored in a fixed dispenser that minimizes messes
- safest option for members with no risk of misuse
- safe & effective on equipment

SPRAY CLEANERS

- disinfectant must be diluted and spray bottles refilled
- paper towels can be wasted and rags must be washed regularly
- spray bottles & towels can be misused and/or stolen
- chemicals are sprayed in the air while others are exercising
- excess spraying can damage equipment & control panels on expensive machinery
